Money hired since March 20, 1862 Due Josethan Denborn, uoje and interest, David Chase, Jr., note and interest,

REPORT

OF THE

Superintending School Committee

OF THE

TOWN OF SEABROOK,

FOR THE YEAR 1864-65.

Your Committee, in compliance with former usage and the requirements of statute law, would submit the following report on the condition of the several schools in this town.

Fellow citizens,—On reference to the School Registers, it is found you have made very few visits to the schools the past year, as compared with some years heretofore, which is indicative of inattention to the present condition of your children, and disinterested as to their future prospects. Your presence in the school-room often, even uninvited, would be pleasing to the teachers and highly gratifying to your children. In so doing you would not only witness the success of the schools, but would be prepared to make any suggestion to your Committee, that might be the means of rendering them still more successful, who would kindly solicit your co-operation, especially those of influence in the cause. And further, your presence would awaken a grateful pride for the notice taken of them, for their standing as scholars and for their love and respect shown to the teachers, and thereby create a just emulation so necessary in such schools for a rapid advancement. Some such manifestation on your part is apparent, to raise them from their present condition, as will be seen by carefully perusing the following: -

DISTRICT No. 1.

Stephen M. Gove, Prudential Committee. H. Maria Dow, Teacher. Wages \$21.

One term of 11.4 weeks; No. of pupils, 14; average attendance, 11; not absent one day, 1; number attended to penmanship, 11; arithmetic, 13; grammar, 1.

During each visit to this school it appeared very orderly and studious, and at the closing examination there was evidence of improvement, particularly among the younger ores. But Miss Dow informed me that for a few weeks she had been unable to control the larger ones; why they became unmanageable she did not state; probably there was no just cause. Miss Dow's qualifications are well known to me, and the circumstance of teaching her first and second terms of the same school in Salisbury, was a good recommendation. When teachers are competent, it is wise in parents to see that their children obey the rules of the school, particularly in your school where you are under the necessity of employing a female to prolong the term.

DISTRICT No. 2.

Arthur Rowe, Committee. Sarah E. Gillespie, Teacher.—Wages, \$24.

Summer term of 18 weeks. Whole number 56; average, 43; not absent one day 2; attended to penmanship, —; to arithme-

tic, 32; grammar, 14.

The children in this school appeared very respectful to their teacher, orderly, attentive in reading, quick in spelling and thoughtful in recitation. Improvement commendable. Miss Gillespie had governed this school 8 1-2 months with pleasing firmness, to the satisfaction of the Committee, and he has reason to believe her labors were well appreciated by the parents.

Winter term of 8 weeks. Julia A. Fremont, Teacher: Wages, \$25. Whole number, 57; average, 44.55; not absent one day, 4; attended to penmanship, 33; to arithmetic, 40; gram-

mar, 13.

This term closed unexpectedly, and the Committee did not review the school near its close in order to judge of its proficiency, but presumes it closed with similar results to that of the summer term in district No. 4, taught by the same teacher.

DISTRICT No. 3.

Calvin Buswell, Committee. Ellen A. Leavitt, Teacher.—

Wages, \$24.

Summer term of 14 weeks. Whole number, 64; average, 47.36; not absent one day, 5; attended to penmanship, 23; to

arithmetic, 27; grammar, 2.

The behavior of this school was orderly, and it made some improvement, but seemed to lack in energy, owing in part doubtless to a deficiency in text books. Miss Leavitt is an experienced and well trained teacher, and when she has the materials and fixtures to operate with, will succeed well; but does not seem inclined to labor very hard where there is any want of preparation.

Winter term of 10 weeks. Edwin Eaton, Teacher. Wages \$37. Whole number, 68; average, 52.82; not absent one day, 8; attended to penmanship, 37; to arithmetic, 42; grammar, 5.

The teacher and scholars of this school have been on very friendly terms; and he has labored to govern them kindly, to interest them, to assist them and to improve them as much as circumstances would allow. As regards their advancement, and the ability of the teacher to effect the same, the Committee submits to the judgment of the parents in the district.

DISTRICT No. 4.

Charles Smith, Committee. Julia A. Fremont, Teacher. Wages, \$20.

Summer term of 16 weeks. Whole number, 93; average, 71; not absent one day,—; attended to penmanship, 20; to arithmetic, 56; grammar, 11. Miss Fremont has had some experience in teaching smaller schools, (I think she told me) and she tried hard to succeed well in this, but it seemed too large for her executive ability. The school at first was turbulent. She introduced exercises in singing, calisthenics and gymnastics, as I infered to gain their favor. The Committee suggested that very little time should be spent in that way as in his opinion children would seek and find out door exercise enough for recreation; but she continued to practice it too much for general satisfaction. Some individuals progressed very well.

Winter term of 9 weeks. John L. Cilley, Teacher. Wages, \$40. Whole number, 79; average, 59.5; not absent one day, 5; attended to penmanship, 36; to arithmetic, 61; grammar 9.

Mr. Cilley is an experienced teacher, and I think has usually given good satisfaction, but I must say he did not keep this school in good sailing trim. The younger scholars appeared indifferent, and careless generally in recitation. Some progress was made, but your Committee could not discover an amount of improvement desirable to you, parents in the district.

DISTRICT NO. 5.

Charles S. Dow Prudential Committee. C. Augusta Sawyer, Teacher. Wages \$21.

Summer term of 6.5 weeks. Whole number in attendance, 101; average, 84.42; not absent one day 21; attended to pen-

manship, 16; to arithmetic, 20; grammar, 1.

This term of school was under the instruction of Miss Sawyer 6 1-2 weeks only. Soon after commencement I found it very orderly and well regulated. What progress was made in so short a time the committee is unable to state, as the school closed in consequence of sickness—he was informed—and before he was made aware of the time of its closing. Miss Sawyer is a competent and faithful teacher, and it is presumed you very much regret her services were not retained for a greater length of time.

Winter term of about fifteen weeks. Joseph A. Fogg, Teacher. Wages \$32. Whole number, 63; average, 47; not absent

one day, 2; attended to penmanship, 16; to arithmetic, 22;

Grammar, 2.

At one time this term there was a little outside pressure upon the rules established and punishments inflicted by the teacher, but it soon relaxed without serious difficulty; and I would say to the credit of Mr. Fogg, he has kept you a very quiet and orderly school. During three visits in this school a little gloominess was observable which is not so encouraging as sprightliness among children, but the term is comparatively long, being still in session; and the committee is hopeful of fair progress for a school of this description taught by an inexperienced teacher.

A few years since your attention was called to the propriety of building another school-house or furnishing an assistant teacher in the one you have; and I renew the call hoping you will devise some means of bringing your children into school. For it is lamentable to say that only a few more than half the pupils in your district have been at school this winter. Think me not indiscreet when I say, you are bringing up your children to be fit subjects of the State Reform School, or eventually, to become

inmates of the Penitentiary.

Several school-houses in town are badly out of repair and cold; the defect should be remedied before another winter, for

the comfort and convenience of your children.

The Committee is of the opinion that some change in books is necessary, especially in arithmetics, for a better and more thorough progress in the science of numbers. Most of these books in use are old and much worn, and a more modern system would be preferable. Children should be suitably armed and equipped for the conflict in which their minds are to be engaged, otherwise they will be retarded in their pursuit, demoralized, and forego much they anticipated to accomplish. Children need their parents' sympathy and encouragement to be respectful, dutiful, and studious in school. Teachers command your respect and support in all they lawfully and reasonably do. Parents that are hasty sometimes condemn teachers for acts misrepresented, and thereby uphold their children in deceiving them and falsely accusing and abusing the teacher. Such would do well to study their own interest, the welfare of their children, and cherish a friendly feeling toward the teacher and the school. If books are not better supplied in some instances it may become necessary for the committee to furnish them and pass the bills into the hands of the

In closing this report of somewhat disconnected sentences, your Committee would respectfully say he has been as brief as possible in conveying a just and reasonable idea of the state and condition of the several schools.

EDWIN EATON,

SUPERINTENDING SCHOOL COMMITTEE.

Seabrook, March 1, 1865.
